DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-40 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dygert (U.S. Patent # 6,864,641) in combination with Nair (U.S. Patent # 7,126,387) or Kawakami (U.S. patent # 4,618,812) and Lebens et al. (U.S. Patent # 6,305,818 B1). Dygert disclose the claimed subject matters a battery operated lighting device (figure 1-4 and 5a-b), including at least one light emitting diode (figure 3, item 102), LED segregated into groups, the groups connected in parallel (figure 3, items D10-M), LED connected in series (figure 3, item D10-n), a resistor is a ballasting element (figure 3, item R20-22), an output voltage higher than battery voltage (figure 3, item 304), However Dygert does not disclose the utilization of the technique for a constant voltage,

Application/Control Number: 10/708,717

Art Unit: 2838

a buck regulator, a subject in film, video, or digital imaging, the microprocessor. Nair (or Kawakami) teaches the utilization of the technique for a regulating circuit providing constant voltage (figure 1, and Abstract line 1-5), a buck regulator (Abstract, line 18-22), a output voltage higher than battery voltage (Abstract, line 15-20) and Lebens et al. teaches the utilization of the similar technique for a subject in film, video, or digital imaging, the microprocessor (figure 2,10 and column 8, line 1-10), a dimmer (column 11, line 35-40, a manually adjustable (column 12, line 25-30), and light intensity control (column 15, line 25-30). It would have been obvious one having an ordinary skill in the art at the time the invention made to modify Dygert's control circuit by utilizing the technique taught by Nair and Lebens et al. for the purpose of providing improved controller for light emitting diodes.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2838

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rajnikant B. Patel whose telephone number is 571-272-2082. The examiner can normally be reached on 6.30-5.00; m-f.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Karl Easthom can be reached on 571-272-1989. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
